

2024-2025

HUMBLE ISD EDUCATION FOUNDATION

DREAM. CREATE. INSPIRE.

Fueling innovation and turning dreams into lifelong learning.

OUR SNAPSHOT

SINCE 2000, WE HAVE...

Grants awarded

to ignite curiosity, fuel creativity, and inspire innovation in Humble ISD classrooms.

Scholarships awarded

to open doors and pave the way for tomorrow's leaders to thrive.

Generously donated

by Humble ISD employees who joined our mission to ignite innovation.

Funds awarded

to Humble ISD to enhance academic opportunities.

WHAT WE DO

We inspire innovation and enhance academic opportunities to create the foundation for lifelong learning.

WHO WE ARE

We are a 501(c)(3) nonprofit organization governed by a volunteer board of directors who represent the demographic regions of Humble ISD.

WHO WE SERVE

48,000+ students, 7,000+ Employees and 49 Campuses

Together for Education:

A Reflection from Our Chair

Dear Friends of the Foundation,

As I reflect on my first year as Chair of the Humble ISD Education Foundation, I am honored to serve during such a meaningful time in our organization's history. We celebrated the Foundation's 25th anniversary last year and the incredible milestone of awarding over \$20 million to support Humble ISD educators and students. This achievement is a true testament to the power of our generous community.

Dr. CaLandra Pervis
24-25 Board Chair

Serving on the Humble ISD Foundation Board is deeply meaningful to me, as it aligns with both my professional journey and personal values. As I celebrate my 30th year advocating for students, teachers, and education, the Foundation's mission allows me to continue championing academic excellence in our community. I currently serve as Chairperson of the Education Department at Lone Star College Kingwood, where I have the privilege of preparing future educators and supporting students as they navigate their first year of college. My work with the Foundation reflects my commitment to service, my belief in paying it forward, and my passion for making a lasting impact in education. My children benefited from the outstanding education provided by Humble ISD, and I want that same opportunity for every child.

This shared commitment to educational excellence is brought to life through the Foundation's continued efforts to support student success. Because of your generosity, the Foundation brings to life creative educational projects that spark curiosity, creativity, and a love of learning. In fact, this past May, the Foundation awarded \$304,537 in just one day to Humble ISD educators!

Of the amazing 61 projects that were awarded a grant, I have a lot of favorites, but as a former FFA parent and an educator, Hoppy Unified Farms stands out as particularly noteworthy. In this project, FFA students will work with students with special needs to raise and show rabbits. Special cages will be built to allow students using wheelchairs and other assistive devices to have access to the cages as they learn to care daily for these animals at school. What a great partnership between our FFA students and Special Education programs!

With great appreciation and an enthusiasm for what we can achieve together, I look forward to my second and final year as Chair. Thank you for believing in our mission and investing in the future of public education.

Financial Overview

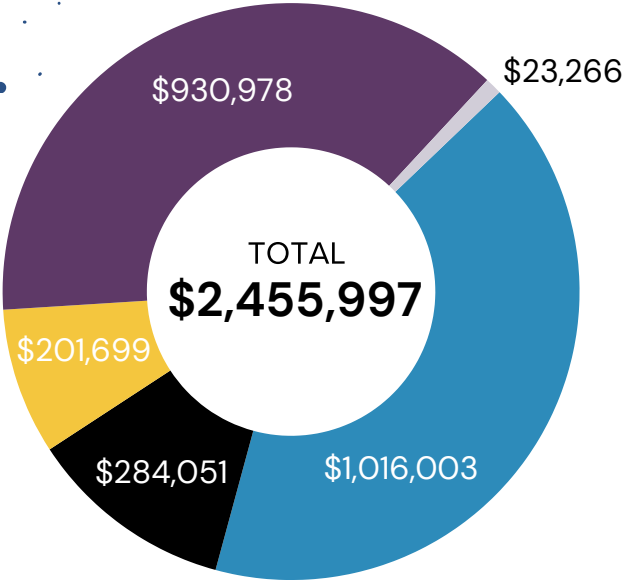

T Stewarding Every Dollar with Purpose

Transparency and accountability are important for us. We are committed to showing how every contribution is invested to advance educational excellence in Humble ISD. Your support makes a difference, and we are honored to partner with you in creating opportunities for all educators and students.

Empowering Educators

I From Small Ideas to Big Dreams

In the 2024-2025 school year, the Humble ISD Education Foundation fostered educational excellence by supporting hundreds of grant requests from teachers. These projects were awarded financial support through the Foundation's two grant programs: the Innovative Education (I.E.) Grants and the Mini Grants program. The purpose of both of these grant programs is to empower educators to bring new ideas to life that enrich student learning.

**Innovative
Education Grants**

60

\$298,537

**Mini Grants,
Big Win**

362

\$85,583

422 Educator Grants • \$384,120 Invested

From science labs and robotics to bilingual initiatives and storytelling corners, I.E. Grants provide teachers with the resources to dream big and turn classrooms into hubs of creativity and discovery. At the heart of every funded project is a shared goal: to create meaningful, engaging experiences that spark curiosity, deepen understanding, and help students thrive as lifelong learners, critical thinkers, responsible citizens, and confident communicators.

Complementing this effort, the Mini Grants program gives teachers a valuable boost at the start of each school year. Offering up to \$250 in funding, Mini Grants help educators pilot new projects, enhance their classrooms, or provide the support teachers need to launch inspiring lessons from day one.

Together, the I.E. Grants and Mini Grants programs reflect the Foundation's dedication to elevating education, supporting educators in shaping a brighter future for every Humble ISD student.

CLAW ARCADE™

Camp Invention Grant
Inspiring Curiosity and Invention

Humble ISD students, from 1st to 11th grade, dove into creativity and problem-solving with the STEM Camp for All. This hands-on summer camp sparked curiosity, built leadership, and unleashed tomorrow's problem-solvers, all while having a blast!

Cameras, Careers, and Confidence:

How a Grant is Changing Students' Futures

What happens when students use the same cameras as Hollywood filmmakers? At Atascocita High School, it's opening doors to college, careers, and even paid commercial gigs.

According to Jeffrey Mack, the audio/video production teacher at Atascocita High School, being able to purchase the Sony FX6 camera has given students the opportunity to take their film content to a new level.

"Before this grant, students were limited to consumer-level cameras which are not tailored for film production. So, it made it challenging to achieve the desired visual aesthetics. Now, they're working with industry-standard tools that are used on the sets of music videos, short films, television programs, and commercials," Mack said.

Because the Sony FX6 mirrors the operating systems of Sony's top-tier cinema cameras used in major film productions, mastery of this technology in high school means students are arriving at college or film sets already fluent in the tools of the trade. Since receiving the camera, students have produced professional-quality videos that have earned tens of thousands of Instagram views, led to paid commercial shoots, and even helped one student land a job with a Houston-based production company.

Students have filmed promotional videos for the City of Humble as well as the Humble Rodeo and are looking forward to elevating the production quality of their "Shattered Dreams" program as well as enhancing their competitiveness in various film contests this coming year. "I feel like our grant project was a huge success and the impact has been wonderful. I'm so grateful to the Foundation because without this grant there's no way we could get this equipment into the hands of the students. We are excited to use our grant to help, not only our school, but our district and the surrounding community," Mack said.

Caden Kesner, an incoming senior at Atascocita High School, will be starting his fourth year as a student in Mack's audio/visual program. A self-proclaimed "camera nerd," he had researched the Sony FX6 and says, "At first, I was intimidated to use such an expensive, professional camera, but once I mastered it, the difference was incredible—sharper, clearer images that looked truly professional," he said.

Since using this equipment, Kesner's skills have become so impressive that a Houston production company hired him to work on commercial and social media projects. Kesner said he is grateful he had the opportunity to learn to use the Sony FX6 while in high school because it prepared him to comfortably handle the different cameras he's required to utilize at his current job.

The success of this program shows how one grant can ripple far beyond a single classroom. Thanks to the Foundation's support, Atascocita High School students aren't just learning about film—they're already making their mark in it.

The Dream That Took Flight In Humble:

The Maria Hernandez Story

Once upon a time, there was a little girl who discovered the universe inside a book. She turned its pages slowly, her mind racing with questions, wondering about the mysteries of life: gravity, light, black holes, the unknown. All wonders that would captivate her heart and never let go. She read the book again. Then again. And again.

Her name was Maria Hernandez. She was just eight years old, sitting on the floor of her home, holding a book her father had given her. “I remember reading that book over and over again,” Maria says, laughing now. “I became obsessed, not just with Isaac Newton, but with space, gravity, and the idea of the universe in general.”

But her dreams and reality were different. “When I was a child, I could only look at the stars, but I couldn’t aim for them,” she says. Where she lived, there were no telescopes, no observatories, no roadmaps to NASA. Just a little girl and a dream too big for her, or so she thought. Still, she held on to that hope.

That little girl grew up and went to college. She enrolled in biomedical engineering. “My dad wanted me to pick something that made money,” she explains. “But I wasn’t happy.” It felt like a compromise. NASA sometimes recruited biomedical engineers, and the field seemed more practical to her parents. But this quickly changed. Maria and her family had to move to Houston, the heart of NASA.

After a short pause in education, Maria enrolled at Lone Star College to pursue a nursing degree. “I’ve never wanted to be a nurse,” she admits. “But I wanted to make my parents happy and study something that would make a little bit more money.”

While pursuing her nursing degree, came the class that changed everything. It was an elective, taken online, called Stars and Galaxies. “I have always been passionate about space, so I had to take it.” One day, her professor invited the class to the Insperity Observatory in Humble ISD. And of course, Maria HAD to go. “We saw Saturn,” she says, her smile wide at the memory. “I couldn’t believe it. I had been seeing movies and stuff like that, but I had never even seen a telescope in real life. I was mesmerized.”

She stayed late asking questions and talking with the Insperity Observatory Director, Dr. Aaron Clevenson. For the first time in a long time, she realized that maybe her dream wasn’t so impossible after all. That same night, she wrote an email to her professor. She needed to meet for advice. “I told her I thought I wanted to change my major,” Maria says. “She told me, ‘I noticed. You are really passionate about space.’”

A week later, her godfather reached out. A quiet man who rarely called, he surprised Maria with questions. What was she studying? Was she happy? Was she sure? Then he shared something deeply personal. The greatest regret of his life, he said, was not doing what made him happy. Then he asked, “What makes you happy?” Maria looked around her bedroom full of posters of space and galaxies. She didn’t think twice. “NASA,” she shouts. “I have always wanted to work at NASA.”

His response was simple: “Then what are you doing with your life?” Maria took those words to heart.

Right after, she walked over to her sister’s house, nervous but ready to say out loud what she had only dared to dream. She wanted to follow her lifelong dream and study astrophysics. Her sister, twelve years older, had always been more like a second mother. “When I told her, she smiled. I think the fact that I was finally choosing to be happy made her happy too.”

The final step was telling her parents. “I thought it was going to be a big deal,” Maria admits. “But when I told them, my dad started crying. I was like, ok, here we go. But he was crying because he was really happy.”

From that moment on, everything changed. Maria became a regular at the Insuperity Observatory in Humble ISD. The very same place that gave her direction, confidence, and the courage to go after her lifelong dream. “The fact that I had the chance to come here and mess with the telescopes and ask questions, I discovered that I could pursue astrophysics. I could get a PhD, study black holes, and do whatever I want. It took a lot of people believing in me and having a place where I could see all the things I dreamed about in one tiny lens.”

Many dreams, discoveries, and “aha” moments continue to happen at the very place that changed Maria’s life. The Insuperity Observatory was built thanks to two years of dedicated fundraising by the Humble ISD Education Foundation. The idea came from a group of passionate science teachers who submitted a proposal through a special one-time grant opportunity called “The Big Idea.” Their vision was bold: to build an observatory on school district property, and the Foundation rallied behind it to make it a reality.

Since opening in 2009, the observatory has become more than a learning tool. It’s a space where students, families, and community members come face to face with the universe, through a telescope and with their own eyes. “There’s nothing more powerful than seeing it for yourself,” says Dr. Aaron Clevenson, Insuperity Observatory Director. “It becomes real. And I think it’s just incredible what this place has done for the district, for the community, and for everyone who has come to visit.”

Investing In Teachers, Inspiring Students:

117 Educator Scholarships and Counting

W

hen teachers grow, students thrive. And thanks to the continued partnership between the Humble Area Retired Teachers Association (HARTA) and the Humble ISD Education Foundation, 22 educators were able to do that this past year.

Since the program began in 2016, 117 Humble ISD educators have received scholarships to pursue advanced degrees, professional development, and alternative certifications - investments that directly strengthen classroom learning.

Jill Honeycutt, a Pre-K Teacher at Elm Grove Elementary, used her scholarship to attend an AI workshop for educators, learning how to create personalized social stories that help students practice new social skills.

“Social stories that can be purchased online are often generic. Using AI, I can input the specific needs of my students and the platform will create a social story that is tailored to our exact needs. I can export the story into a document and add photographs of our class as the illustrations and then create a book that we use in class to learn and practice new skills. This is especially important in reaching my students with special needs because they are able to literally see themselves in the story and that helps them learn and apply new concepts and behaviors more readily,” Honeycutt said.

Honeycutt said she was very excited to learn she had received the scholarship because she tries to take a class every year to help her grow as a teacher.

“Receiving the grant not only made me feel supported in my educational journey, but it gave me a boost of confidence to try something new and just a little intimidating! I am so thankful for this

opportunity because it helped me grow as a teacher. In fact, I was so excited about what I learned that I came back and taught a Professional Development course on AI for the teachers on my campus and then presented it again during summer for the Early Childhood department,” she said.

Like Honeycutt, Atascocita High School Social Studies Teacher, Evan de la Haye used his scholarship to push his own learning—and inspire his students to do the same. De la Haye was awarded a scholarship last year toward completing his Master’s Degree at Sam Houston State University. He began that journey in 2021 and graduated in 2025.

“Working with high school seniors, I was always encouraging them to have goals and to strive to achieve greater things. After saying that for so long, I decided that I needed to live by example and do the same. That’s when I went back to school,” he said.

Going back to school was a humbling experience for de la Haye, as he was reminded how it felt to be a student again. He realized, in looking to his professors for guidance, that his students were looking to him as well. This inspired him to become the best instructor that he possibly could and to model for his students what an educator should truly look like.

“The HARTA Educator Scholarship was instrumental to the completion of my Master’s Degree. With their support, I was able to refine my academic skills and abilities and put those efforts towards benefiting Humble ISD students,” de la Haye said.

When we invest in educators, we invest in every student they inspire. If you’d like to help more teachers grow through this program, contact the Foundation to learn how you can make a difference.

Fueling Dreams, Shaping Futures

Opening Doors for Graduating Seniors

W

e believe in the power of education to transform lives. Through our partnerships with generous community supporters, we offer scholarships that help graduating seniors take the next step toward their future. These scholarships are an investment in the next generation of leaders, innovators, and change-makers. Since 2000, we have given over \$1.4 million, helping Humble ISD students achieve their dreams. Each scholarship tells a story of hope, hard work, and the promise of a brighter tomorrow.

Interested in setting up a scholarship? You can create a lasting legacy with an endowed scholarship or an annual scholarship, both helping shape the future of Humble ISD students.

For more information, visit HumbleISDFoundation.org.

A Scholarship That Changed Everything

The Lorelei Spears Story

When Lorelei Spears sat down to complete her scholarship application through the Humble ISD Education Foundation, she expected a list of endless questions. Instead, she found something unexpected: a place to tell her story. “It made me feel like a person,” she said. “Not just a GPA score. For the first time, I felt like someone cared and wanted to hear who I was as a person.”

That moment was more than just a turning point in the application process, it was a turning point for Lorelei. “When I was awarded a scholarship, it gave me confidence,” she said. “It told me that I mattered.” She is thankful for the wonderful teachers that helped her along the way and prepared her for college classes. She said, “Humble ISD prepared me to excel in my classes and it spilled over into college. I received Honors and STEM scholarships.”

Drawing made by Lorelei Spears.

The scholarship helped her more than financially; it helped her believe in her future. With her renewed confidence and sense of value, Lorelei carefully mapped out her college path of becoming a nurse. Rather than take on overwhelming debt, she chose to attend Lone Star College for her first two years. She proudly graduated in May 2025 with honors and an Applied Science Associate degree. Now, she is transferring to her dream school in the fall: Texas Women's University. She will graduate in May 2027. Her decision was strategic and bold.

“If I hadn't planned it out, it would have cost me over \$80,000 to get the same degree with the same classes at a local university,” she said. “Now, I am transferring to Texas Women's University with no college debt. The scholarship I received from the Education Foundation helped pay for all my books.” Lorelei's goal is to earn a BSN in Nursing and become a Pediatric Nurse. She helps fund her college expenses by working as an art teacher during the summers at Cordovan Art School teaching five-year olds how to create art. Her path forward is clear, thoughtful, and full of purpose. And it all started with a scholarship that made her feel seen and gave her confidence to map out a plan for her future.

Lorelei's story is one of many that have been shared by Foundation scholarship recipients through the years, and is what motivates the Foundation to continually expand the scholarship program. In fact, when the program began in 2009, only two scholarships were offered. This past year, more than 80 different scholarships were awarded to graduating seniors, totaling more than \$318,000 awarded in May 2025!

One of the reasons for this growth is the increasing number of local organizations choosing to partner with the district to offer scholarships. Parent groups such as PTAs, PTOs, and booster clubs have found the Foundation's streamlined process to be both efficient and trustworthy, making it easier than ever to set up and administer scholarships. By working with these groups to streamline the application, selection, and disbursement processes, the Foundation reduces the administrative burden on these groups while ensuring consistency and fairness across the board. This collaboration not only encourages more community involvement, but also creates more opportunities for students of all backgrounds to be recognized and supported. As word spreads about how easy it is to participate in the program, more donors are stepping forward each year, fueling a cycle of generosity that benefits students and strengthens the bonds between the Foundation, Humble ISD schools, and their communities.

When You Nurture Students, You Create the Leaders of Tomorrow

It is exciting to see our Humble ISD alumni make the world a better place with their leadership, community service and professional contributions. The Distinguished Alumni Award gives us the chance to put a spotlight on these alumni and their remarkable achievements. Below are the 2025 recipients for the Humble ISD Distinguished Alumni Award and we encourage you to read their full bio and accomplishments on our website.

A Legacy Of Learning

A Future Full of Promise

Twenty-five years, thousands of students inspired, and countless innovative classroom projects brought to life - what a journey it has been!

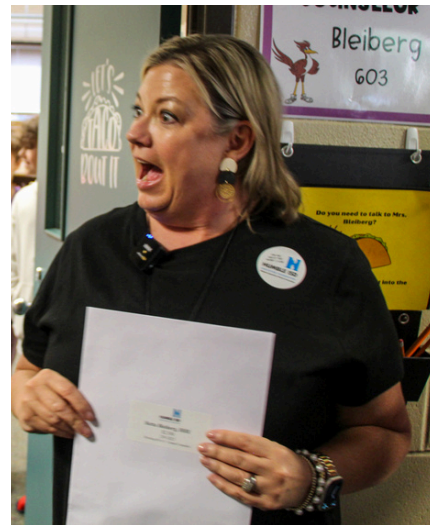

Some people celebrate anniversaries once a year, but we think awarding over \$20 million in grants and scholarships over the past 25 years means you get to celebrate all year long and that is just what we did! We kicked off the festivities for our 25th anniversary at our August board meeting with a special birthday cake, setting the tone for a year of reflection and gratitude.

We then found special ways to highlight this milestone at each of our fundraising events, but the true highlight of the year was our reception on September 25, 2024, at Lone Star College Kingwood. Current and former board members, along with many cherished friends of the Foundation, gathered for a heartfelt journey through our history. Educators movingly shared how your generous donations have made an impact in their classroom. Every story shared reminded us that your generosity isn't just about funding projects. It is about sparking curiosity, igniting passions, and shaping futures.

What made the reception even more memorable was the attendance of the Foundation's inaugural Board Chair, Tom Schneider, and our first Executive Director, Dr. Karen Perkins. It was an evening of heartfelt reconnections, with former board members sharing fond memories of their service to the Foundation.

As we celebrated this milestone throughout the year, one theme resonated above all: the incredible impact of your philanthropic support. Thank you for being part of this incredible journey. As we honor the past, we are just as excited about the future. Together, we will continue to inspire innovation, support educators, and create opportunities for every Humble ISD student for the next 25 years and beyond. Here's to the next 25 years of making a difference TOGETHER.

Traditions of Giving

Fundraising for a Cause

Every great story has unforgettable moments, and ours are dressed in cowboy boots, colorful golf shirts, and sometimes designer purses. Our events are designed with one goal in mind: to bring people together to support the students and teachers of Humble ISD. These aren't just fundraisers. They are celebrations of possibility. Moments where laughter turns into learning and community turns into change.

We begin our year in August with a new fan favorite: Purse Bingo. This high energy night invites girl gangs and best friend crews to play for high-end handbags. With creative themes, spirited table décor, and a room full of players ready for fun, it has quickly become the perfect way to kick off the school year in style.

In November, we keep the momentum going with our oldest tradition: the Annual Golf Tournament. Started in 2000, this fall favorite is packed with fresh air, friendly competition, and a passion for giving back. Business leaders, educators, and community partners swing big “fore” the kids with every round from tee-off to trophy.

From the green, we head straight to the arena. Each winter, the Humble Rodeo and BBQ Cook-Off brings the heart of Texas to our backyard. Whether it is the thrill of the rodeo, the smoky goodness of competition BBQ, or live music under the stars, this event delivers two weekends of fun while raising funds that fuel classroom innovation.

We wrap up the season with the biggest party of them all: the Boots and Bling Gala at Stampede Houston. This fun evening honors Humble ISD educators and shines a spotlight on the incredible work happening in our schools. From karaoke and bull riding to surprise announcements and a packed dance floor, it is a night guests never forget and one our teachers deeply deserve.

As you see, these events are more than just traditions. They are proof of what happens when a community comes together with a shared purpose. Every ticket purchased, every bid placed, and every moment shared has helped us invest more than \$20 million into Humble ISD and we could not be more grateful.

Foundation Partners

A Future Full of Promise

Business partners are key to the Foundation being able to reach as many educators and students as possible. Below is a list of our local business and organizations who sponsored Foundation events or supported special projects in the 2024-2025 school year. We are deeply grateful for these partners!

You Have Seen the Impact. Now, What is Next?

More Stories, More Dreams, More Change

Every story and journey in this report started with a spark, an idea, a need, a dream, and someone like you who chose to give.

When you support the Humble ISD Education Foundation, you're not just funding programs. You're fueling futures. You're saying yes to creativity in classrooms, confidence in students, and hope in hallways.

Let's keep the momentum going! Together, we can continue to change lives. One student, one story, one gift at a time.

As you read through this report, I hope you felt the same sense of pride and excitement we do about the incredible journey our Foundation has taken, made possible by the support of our community.

Our 25th anniversary was not just a time to reflect, but also a moment to focus on the future we're building together. Every donation, volunteer hour, and partnership plays a vital role in shaping the future of Humble ISD. Your commitment has made a lasting difference, and we look forward to the next 25 years of enriching the lives of our students.

Thank you for being part of this incredible journey.
